# Introduction To Family Medicine

Family medicine is a specialty which deals with the common ailments that patient may present with. It is not limited to anybody system, gender or age. In Pakistan, it is called general practice but it is a specialty in its own right which is also recognized by the College of Physicians and Surgeons Pakistan (CPSP).

## FCPS

FCPS stands for fellowship of College of Physicians and Surgeons Pakistan (CPSP) recognized by PMDC, HEC, and Saudi Arabian Council. You can be appointed and promoted as Assistant professor, Associate professor or Professor according to experience and publications in any institution. The training is also recognized in Canada and elsewhere.

**Eligibility:** 4 years of training followed by theory and clinical exam

## Feedback

“I must highly recommend to all general physicians that Dr.Faridah Amin's Academic group is quite knowledgeable, gives tremendous confidence and provides a platform to understand the right approach to manage patients in primary Healthcare. I also appreciate their efforts to make our future brighten and for providing the platform to become a good general practitioner of Family Medicine in future. Thank you for all this efforts and guidance.”

***Dr. Rabia Shikho***

“I would like to share my experience that MCPS /MRCGP (INT) Family Medicine Course was very helpful for me regarding the examination as well Basic Knowledge of General Practices. The way of teaching of PROF MADAM DR FARIDA AMIN was very amazing, it boosts up my knowledge in practices. So, I am really great full to you Prof.Faridah Amin and the whole team.”

***Dr. Sunail Dayanand***

“When I joined these classes, I wasn't aware of her credentials as I've been living in Lahore for many years. After taking these classes, I can safely say that I received expert knowledge from such an amazing and experienced teacher who truly has a passion for her field. She made my learning journey so easy and she delivered the content in such an effective manner. I would highly recommend taking her courses especially to those who are either recent med school graduates or even seniors like me who haven't opened their medical books in a long time. I thoroughly enjoyed myself and learnt a lot through her video lectures. Kudos to you for making family medicine so understandable & accessible for me and others.”

***Dr. Shamoona Shoaib***

“This course was very helpful for me to upgrade my knowledge, skills and most importantly to improve my professional ability as a Family Medicine Specialist. You are not only a teacher, in fact a great motivator, a kind doctor and a good person.”

***Dr. Asim Muneer***

“With the grace of God and Dr. Faridah Amin, I have passed my MRCGP [int] theory exam. I can't thank enough to ma'am Faridah Amin for such great guidance.”

***Dr. Shaista Norain***

“Lots of prayers and good wishes for her. We had a wonderful 8 months period with Dr Faridah, full of learning new concepts and revising old knowledge. The best thing about her is that she kneels down to our level and doesn't move to next topic until the first is crystal clear, she taught newer guidelines and updates in such a simple way that I feel it's imprinted on our brains. MashAllah I'm a fan of her own knowledge and the way she imparts it to students.”

***Dr. Sana Firdous***
