Publishing research papers plays a significant role in advancement of any professional career. Your worth is directly proportional to the number of research papers you have published. It also helps you disseminate your findings to a larger audience.

Writing a research paper is a science as well as an art. Whether your paper gets accepted in a scientific, high impact journal depends on the quality of the research question, research methodology, results and write up.

FA Educators is dedicated to strengthen medical education in South Asia especially Pakistan. Therefore we are offering various online clinical and research courses in order to improve the quality of research and physicians in the country.

Professor Faridah Amin (MBBS, FCPS, FRCGP ^{Int} UK, Masters in Clinical Research (AKUH), Ph. D in Health Sciences (AKUH) is the CEO and she personally teaches research and clinical courses. The courses are all online, on weekends and the facilitator encourages interactive learning through assignments and individual feedback on assignments.

If you are a medical student, a doctor, a faculty, a basic scientist interested in clinical studies, a physiotherapist, a nurse, a research associate, a medicine and allied personnel, a public health professional or a medical educationist you must take these research courses to get a basic understanding of research methodology and improve your writing skills to produce quality research papers, with high chances of publication in scientific journals..
